

Background:

1. What was your background in evolutionary biology before attending class?

15 responses

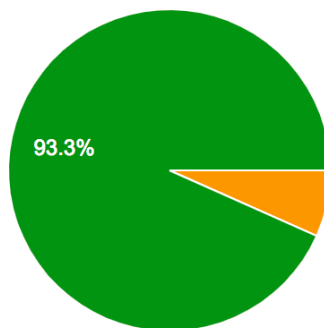

- No background
- Limited background knowledge- my high school biology class had briefly touched on evolutionary genetics
- Some background knowledge- my high school biology class had discussed at least one of the topics...
- High background- I had completed an advanced course in evolutionary genetics/ was introduced to all or m...

2. My understanding of evolutionary biology changed between the beginning and end of class in the following way:

15 responses

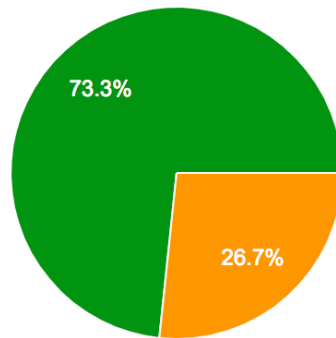

- Decreased- now I just feel very confused about everything
- Stayed about the same- nothing new was covered/all new topics that were covered were too confusing for me t...
- Increased subtly- I learned a little, but much of the class felt too advanced for me
- Increased substantially- I feel like I learned a lot or was exposed to ma...

3. The topics we covered in class were new and interesting

15 responses

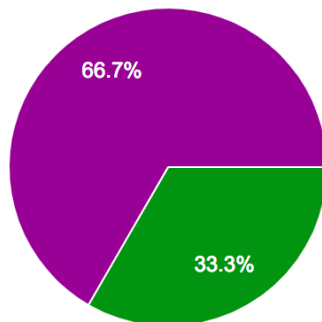

- None of the topics were new to me
- None of the topics were interesting to me
- Some of the topics were new/interesting to me
- Most of the topics were new/interesting to me

4. What was your level of enjoyment of the course material?

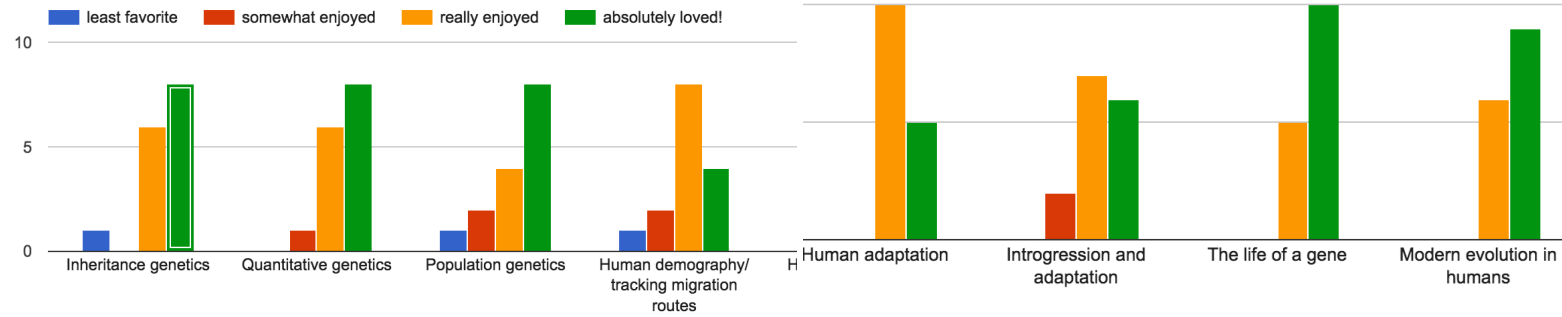

15 responses

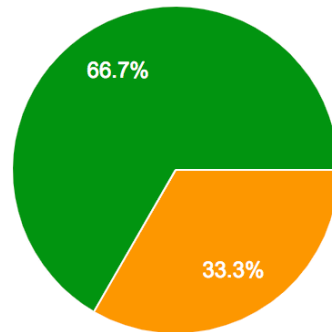

- I really hated it
- I feel neutrally about the class- it was something to do every morning
- I feel somewhat positively about the class- some aspects were interesting, but I wasn't as engaged as I could h...
- I feel very positively about the class- I was engaged and enjoyed the mate...
- I loved the class- it was a unique experience, and I felt excited and e...

5. Which topics did you enjoy the most/least?

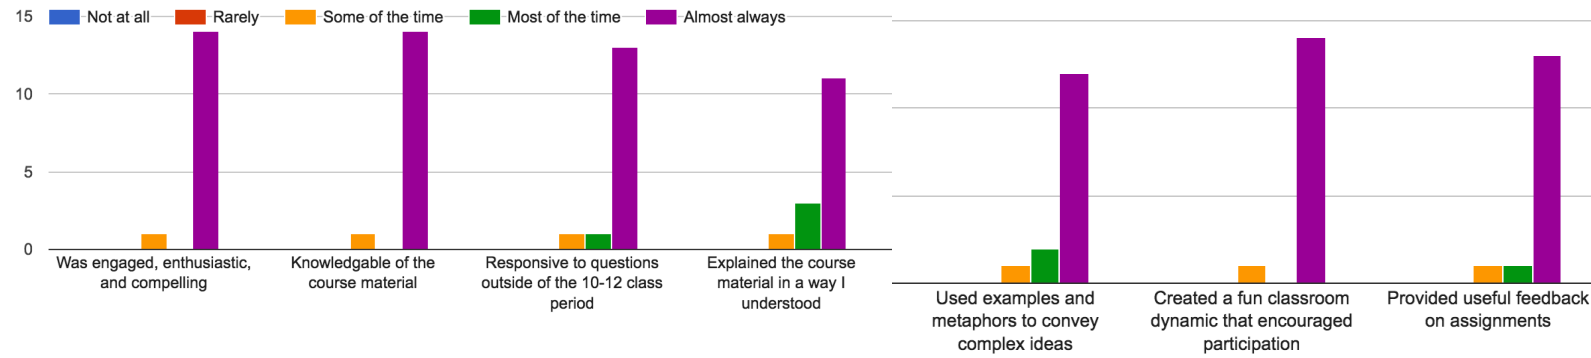

6. My overall thoughts on the course content

15 responses

- I disliked much/all of the course content
- I liked some of the course content, but found a substantial proportion boring/uninteresting/too confusing
- I really liked much of the course content
- I loved the course content!

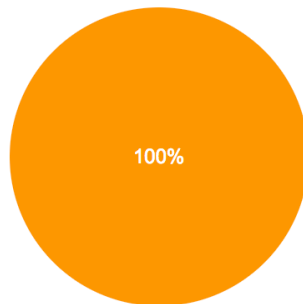

7. The course instructor...

8. My overall feelings on the course instructor

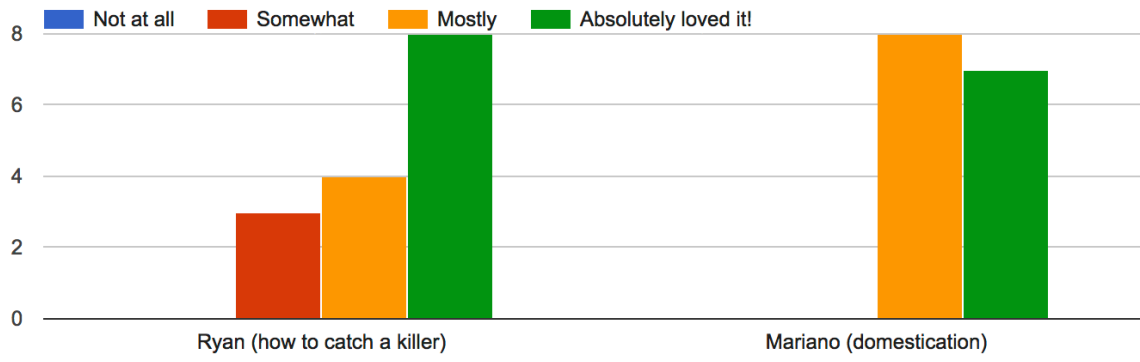

15 responses

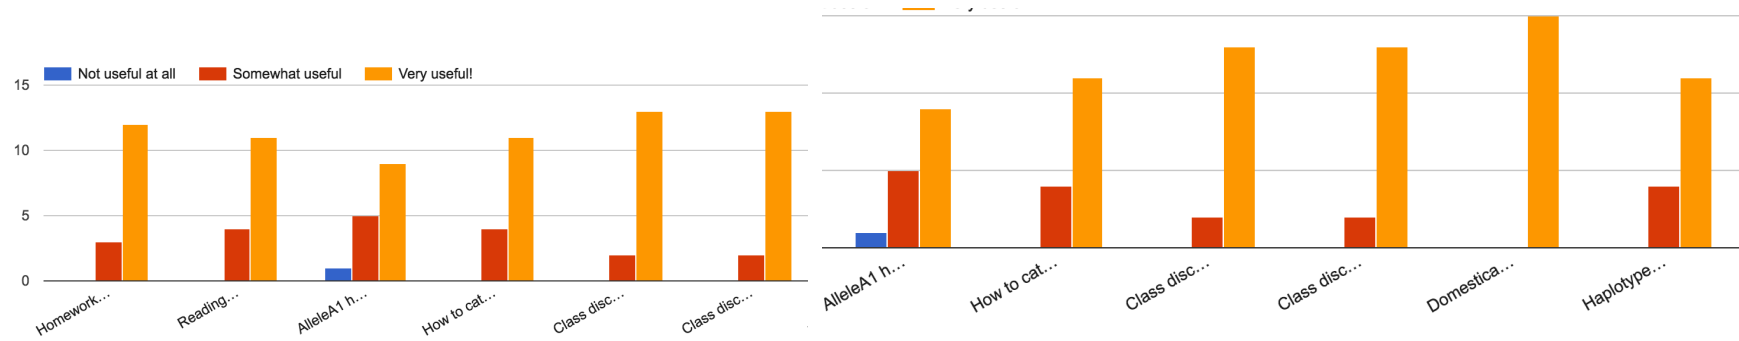

- Generally negative- I did not enjoy her style/pace
- Somewhat enjoyed- there were some aspects of her teaching that I enjoyed, but also there were major flaws (please leave a comment below if this is the case!)
- Really enjoyed- overall, I feel positively about her teaching style/pace/enthusiasm, and I found her very helpful

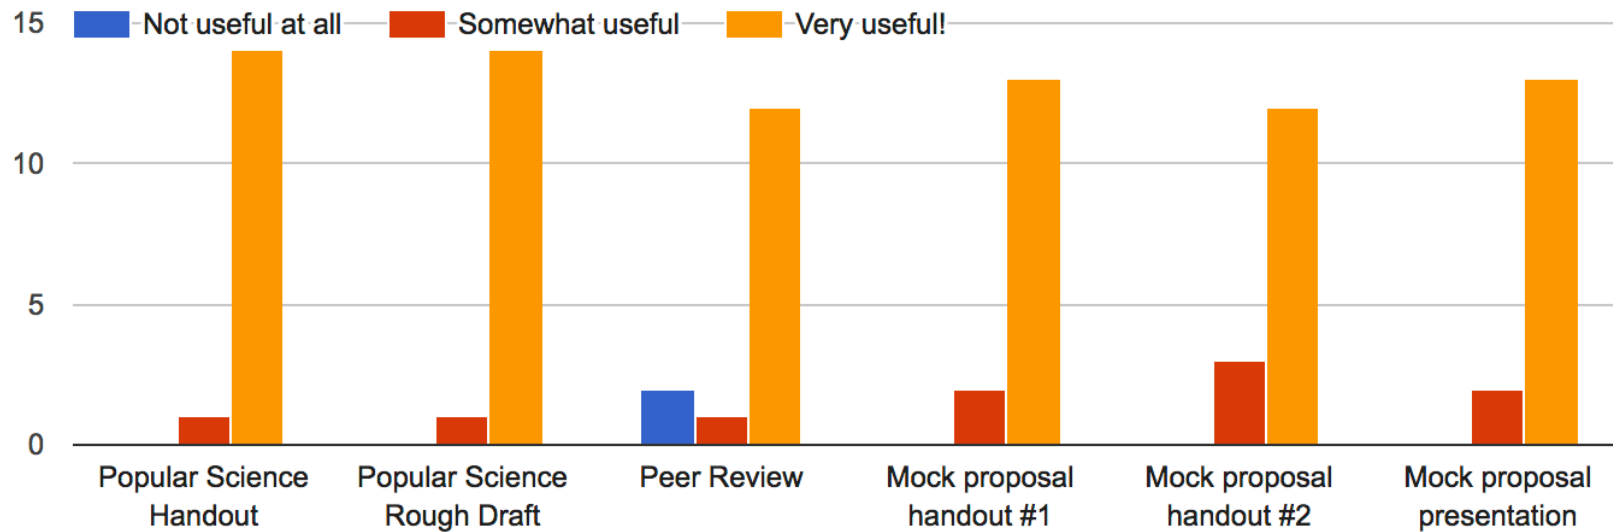

9. I enjoyed the guest lectures

10. The activities that we completed in class/ for homework were useful for my learning in the following way

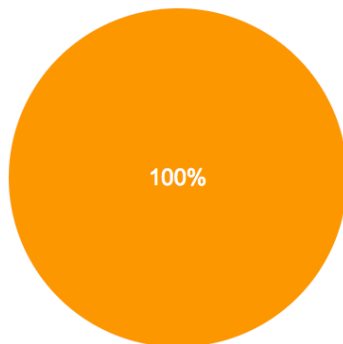

11. The assignments for the class were helpful in bettering my understanding of the class material in the following way:

12. I liked that each big assignment had many smaller components

15 responses

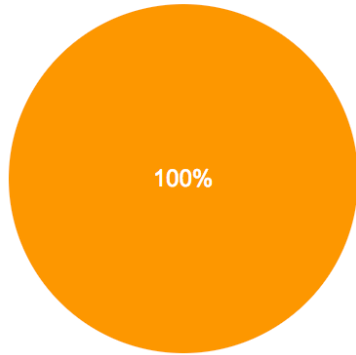

- False- I wish we had just done one big assignment with no sub-components
- I neither agree nor disagree, would have felt fine either way
- I really enjoyed that each big assignment was broken down into component parts/built up

13. My overall feelings on the activities and homework:

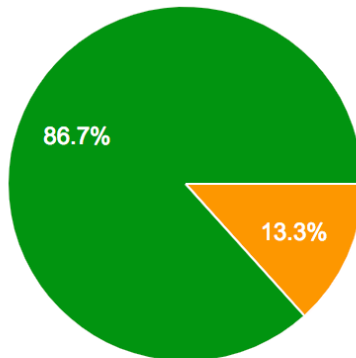

15 responses

- Hated it, totally useless.
- Somewhat useful, but needs a revamp
- Mostly useful- I enjoyed the activities and I feel like I learned something

14. My overall feelings on the course

15 responses

- Really disliked it, wish I hadn't taken it
- It was ok, but I feel neutral as to whether I would recommend it
- Generally liked it, but would be a little hesitant to recommend it based on what/ how we learned
- Absolutely loved it, would recommend it to friends who were interested in this topic
